Rotim Verpakkingen B.V. hereby declares, under its responsibility and on the basis of the applicable technical documentation and supporting supplier information, that the packaging identified in Section 2 is assessed with regard to the substance requirements of Article 5 of Regulation (EU) 2025/40 on packaging and packaging waste (PPWR).

Heavy metals — In accordance with directive article 5(4), the sum of the concentrations of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr(VI)) resulting from substances present in the packaging or packaging components shall not exceed 100 mg/kg.

PFAS — Although PFAS is not intentionally added to the product or used in the manufacturing process, it cannot be entirely ruled out that traces of the aforementioned substance may be present in the product. At the time of this statement's issuance, several provisions of Article 5.5 are still under development. The European Commission has not yet published the final list of PFAS substances subject to restrictions. Discussions regarding harmonized testing methods are still ongoing, and feedback from the industry is being taken into account. We are closely monitoring developments regarding the PPWR and will issue revisions to this statement if developments make it necessary.
